EDUCATION

B.S.

Civil Engineer

Tashkent architecture and
construction institute

📅 September 2016 - April 2020

📍 Tashkent, Uzbekistan

Relevant courses

- Google Data Analytics Specialization
- Python for Data Science, AI & Development
- Data Analysis with R Programming
- Data Manipulation at Scale: Systems and Algorithm Data Science Methodology

CAREER OBJECTIVE

Organized, communicative, and quick-to-learn For the last 4 years I have been working as a civil engineer and combined data analytics, where I developed my programming and data processing skills and made construction price forecasts by analyzing our current costs and finding correlations. Estimated cost for next year. Seeking an opportunity as a data analyst to contribute to data conversions and process improvements.

WORK EXPERIENCE

Civil Engineer; Data Analyst

Plaza Building

📅 2018 - current 📍 Tashkent, Uzbekistan

- Received, cleaning and preparation of data from the Excel client to help marketing mix professionals, resulting in a more in-depth assessment of profits or losses from new construction.
- Built data visualizations using Excel and Tableau for business KPIs that reduced manual reporting work by 10 hours weekly.
- Using Excel, built a calculator for a client to help them prioritize a project roadmap.
- Collaborated with product managers and analysts, gaining insight and growth in marketing aspects and writing documents based off user data.

SKILLS

- Programming: SQL, Python, R - Junior Level
- Data Visualization: Excel, Google Sheets, Tableau - Junior Level
